

Free Smoke Detectors Including Installation

The Richmondville Fire Department, in conjunction with The American Red Cross, is offering free smoke detectors as well as installing them in residences in our fire district. In New York State alone this year 54 people have died in house fires. Across the country 799 people have died since January first. The best protection is early detection of a fire. Smoke Detectors are the first line of defense. Maybe you have old smoke detectors that haven't worked in months because the batteries went dead, and no one replaced them. Or there are not enough detectors for the size of your house. Maybe you are unable to replace your old detectors yourself because of physical restrictions. Maybe you don't even have smoke detectors. We will come to your house with new smoke detectors that have 10-year batteries and install them for you at no cost. We want to ensure that no one in our community loses their life in a fire needlessly. Give us a call so we can schedule a time and date when we can install them for you. leave a detailed message on our phone with information such as full name, address and phone number where you can be reached during the day. Someone will contact you within a few days to set up a time to assist you.

Thank You
